Professional Summary

Results-driven Data Analyst and B.Tech CSE student (CGPA 8.0) combining deep technical expertise in SQL, Python, Pandas, and Power BI with modern GenAI tools. Proven track record in designing database architectures, automating exploratory data workflows, conducting rigorous A/B testing, and delivering actionable business insights. Solved 200+ LeetCode problems (including SQL 50).

Skills

Programming & Databases: Python, SQL, MySQL, PostgreSQL, SQLite, MongoDB, Supabase, C++, JavaScript
Data Analysis Statistics: Pandas, NumPy, EDA, Hypothesis Testing, A/B Testing, SciPy, Statistical Modeling
Excel Tools: Pivot Tables, VLOOKUP, XLOOKUP, Charts, Slicers, Conditional Formatting, VS Code, Docker, Google Sheets
Visualization Reporting: Power BI, DAX, Power Query, Matplotlib, Seaborn, Tableau, Streamlit, Dashboards
GenAI LLM Tools: Hugging Face, LangChain, Gemini API, OpenAI APIs, Prompt Engineering, GitHub Copilot

Work Experience

Data Analyst Intern | Army Base Workshop, Meerut, UP | Jul 2026 – Aug 2026
[Trishul Analytics Page]
- Designed the data architecture and analytics for Trishul, a fleet maintenance system, transforming paper logs into robust SQL schemas for assets, jobs, and inventory tracking.
- Built vendor rating and job status dashboards to pinpoint operational bottlenecks, optimizing database indexing to significantly accelerate report load times.

GenAI Powered Data Analytics Job Simulation | Tata , Remote | Sep 2026
[Tata Completion Certificate]
- Completed Tata's analytics simulation, leveraging generative AI workflows to streamline exploratory data analysis, interpret business trends, and generate executive reports.

Projects

Retail Analyzer (Retail Pulse) | Python, SQL, Pandas, Scikit-learn
What it is: A customer-intelligence engine segmenting e-commerce buyers via RFM behavior to drive targeted CRM retention strategies. [GitHub Repository]
- Developed a 3NF SQLite/SQLAlchemy schema applying log1p skew-corrected RFM scoring and K-Means clustering to categorize customers into 10 tactical CRM segments.
- Uncovered that Champions (19.9% of users) drive 38.9% of revenue, while Champions combined with Loyal customers generate 57.9% of total store revenue.
- Engineered monthly cohort retention matrices and cumulative LTV/ARPU growth curves to evaluate cohort stickiness and optimize customer retention marketing budgets.

A/B Testing & Statistical Analysis | Python, SciPy, SQL, Statistics
What it is: A rigorous experimental analysis testing a landing page redesign to deliver an objective ship/do-not-ship business decision. [Full Report]
- Processed 294,478 raw user rows from a Kaggle experiment dataset, cleaning mismatches, checking Sample Ratio Mismatch ($p = 0.947$), and executing z-tests, chi-square, bootstrap, and power calculations in SciPy.
- Demonstrated no statistically significant conversion lift (Control: 12.04% vs. Variant: 11.88%, $z = -1.31$, $p = 0.190$, 95% CI [-0.39%, +0.08%]), confidently ruling out meaningful positive variance.
- Formulated a clear recommendation to halt deployment of the new page, backed by extensive sensitivity and weekly trend validation checks.

Olist Brazilian E-Commerce Analytics | Python, SQL, Pandas, Streamlit, Excel, Power BI
What it is: An end-to-end marketplace audit examining delivery delays, customer satisfaction drivers, and repeat purchase barriers. [GitHub] | [Live Streamlit App] | [Report] | [Excel Workbook]
- Analyzed 99,441 marketplace orders (2016–2018), evaluating 96,478 delivered orders against a GMV of R$ 13.22M and total payments of R$ 15.42M.
- Proved that delivery speed heavily dictates customer satisfaction (late orders averaged 2.57 stars vs. 4.30 for on-time deliveries) and identified low repeat purchase rates (3.0%) as a primary revenue leakage point.
- Delivered a fully interactive 4-page Streamlit web app, an 11-sheet Excel financial model with dynamic formulas, and a comprehensive Power BI dashboard pack.

Achievements & Certifications

- Solved 200+ LeetCode problems, including 50+ SQL problems (SQL 50).
- Certificate: Deloitte Australia Data Analytics Job Simulation — Forage, 2026.

Education

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Ghaziabad, UP | 2023 – 2027
Bachelor of Technology in Computer Science and Engineering — CGPA: 8.0/10.
