Ayushi Singh

+91 8766315441 | ayushi.singh0618@gmail.com | LinkedIn | GitHub | YouTube

Professional Summary

Full Stack Software Engineer specializing in scalable web development, backend architecture, and AI-driven solutions. Experienced in building production-ready applications, optimizing database performance, and delivering robust full-stack software for real-world deployments.

Education

Dr. A.P.J. Abdul Kalam Technical University — Ghaziabad, Uttar Pradesh
Bachelor of Technology in Computer Science and Engineering; ***CGPA: 8.0 / 10*** — *2023 – 2027*

Experience

Software Engineer Intern — Meerut, UP
Army Base Workshop — *July 2026 – August 2026*

- Developed **Trishul** (Live App | GitHub), a military-grade digital workshop and fleet maintenance management platform featuring real-time asset tracking and automated inventory alerts.
- Architected secure RESTful backend endpoints using Node.js and Express to streamline departmental workflows and data collection.
- Engineered SQL database schemas to handle complex relational data for asset maintenance logs, reducing manual tracking overhead.
- Implemented live departmental scheduling calendars and automated vendor evaluation dashboards to optimize workshop productivity.

Software Engineering Job Simulation Intern Certificate — Remote / Virtual
J.P. Morgan (Via Forage) — *September 2025*

- Completed practical software engineering tasks involving backend microservices and interface integration.
- Implemented Kafka integration and Spring Boot concepts to handle event-driven data workflows.
- Analyzed system requirements and optimized interface performance for financial data processing tasks.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, SQL, HTML5/CSS3
Frameworks & Libraries: React, Next.js, Node.js, Express, Tailwind CSS, WebSockets
Databases: MongoDB, MySQL, Supabase
Tools & Platforms: Git/GitHub, Render, Vercel, Netlify, Docker, CI/CD
AI & Cloud APIs: Google Gemini API, Google Cloud Vision API, Hugging Face Inference, RAG, MCP

Projects

Trishul (Kavach) Live App | GitHub

- Built an end-to-end military-grade digital workshop and fleet maintenance management platform to digitize asset tracking.
- Integrated live departmental scheduling calendars and procurement vendor evaluation modules for streamlined operations.
- Implemented automated inventory alerts and secure role-based access control for administrative personnel.
- Designed backend workflows handling real-time status updates with optimized SQL database indexing.

DSA Daily Coach Live App | GitHub

- Developed an interactive web platform tailored for technical interview preparation and algorithm practice.
- Combined a comprehensive problem library, built-in coding workspace, and gamified streak tracking to boost user engagement.
- Integrated structured learning paths focusing on core algorithmic patterns like Two Pointers and Sliding Window.
- Optimized client-side rendering and local storage persistence for a seamless, distraction-free practice environment.

Food For Mood AI Live App | GitHub

- Created a full-stack LLM web application targeting sub-200ms latency for real-time recommendations.
- Integrated Google Gemini AI to analyze user emotional incidents and generate personalized comfort food suggestions.
- Implemented real-time cart management and order tracking powered by WebSocket connections and MongoDB.
- Designed a responsive, modern frontend interface using React and CSS for dynamic emotion-based UI transitions.

Achievements & Coursework

Achievements & Competitions: Internal Smart India Hackathon (SIH) Winner; Solved 150+ LeetCode problems focusing on advanced algorithmic patterns; 'Code Like Lily' YouTube (@liliescodes) — animated DSA & tech explainers with study notes.
Relevant Coursework: Operating Systems (OS), Object-Oriented Programming (OOPs), Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Computer Networks (CN)
